

Public Works Report

April 2022

The Towns Static water level in Well number three is at 21 feet. In the month of April we have been busy with numerous projects throughout the Town. We fixed a broken curb stop valve on Sterling Street. The customer had a leak on her side and asked that the Town shut the water off. The broken valve prevented us from doing this, so we replaced the valve with a new one. We mowed the field next to the church at the north end of town, along with all the other parks. We fixed a leaky hydraulic line on the backhoe. We dug out the Towns septic tank. We removed all the Little Leagues equipment from the old shed. We demolished the old shed at the Little League Park. We prepared the space for the new shed. We used the weed eater around town. We replaced the flag at City Hall with a new one. We fixed some more broken sprinklers at various ball parks. We assisted in the setting up of the new equipment shed at the Little League Field. Everett is continually studying for his wastewater treatment examination. We replaced the old flag on Main Street with a new one. We read all the meters and took out all of the trash. We moved the infield soil to the Little League Park and spread it out. We assisted the code enforcement officers and the Public Health Department in sanitizing a house on Marbleview Road. We researched a new flowmeter for the Wastewater Treatment Plant. We researched which sewer camera would be adequate for inspecting The Town's sewer system. We made new foul lines in the Walker Field baseball park. We used the edger to try and remove the lip that is in the infield of the Little League Park, with some success. We removed a large broken branch at Walker Fields. We cleaned up some graffiti sprayed around Town. We installed a new sign on Sterling Street. We raised a water box up to the grade of the natural soil on Main Street that a customer was complaining about. We assisted a customer on Bower Street with a backed up lateral, and showed that the Towns sewer system was flowing fine. We started handing out late notices to different customers throughout Town. These late notices are to inform the occupants of their past due balances. Failure to address these issues will result in Public Works shutting off the water to the premise.
